Distinctive and Dependable: A Winning Combination

With the holidays almost here, it's time to stock up with locks for security-conscious travellers. Trust Sterling to have the key to securing those extra sales.

For easy identification of luggage, in a crowded hall or on a baggage carousel, Sterling's new coloured padlocks come in Red, Blue, Green and Black and are certain to stand out from the crowd.

Keyed alike in pairs, they are perfect for travellers who have more than one case to protect but only want to carry one key. With a strong steel shackle and corrosion-resistant solid brass body, these locks have all the qualities of other Sterling products, but with a distinctive plastic covering to catch the eye.

Also ideal for luggage security, Sterling Combination padlocks are easy to operate with re-settable combinations and are guaranteed to make a hit with holidaymakers. Combination padlocks come in a variety of sizes, with 20mm or 30mm sizes ideal to suit any size case or sports bag. With Sterling quality as standard, these padlocks are ideal for when keys are not convenient or as a multiple access security solution.

With distinctive red and yellow packaging and carrying a 10-year guarantee, these Sterling products really jump off the shelves, offering customers quality and value from a brand they know and trust. The clam packs are great for easy product display and icons and bullet points clearly show the key selling features and uses for each product.
