Phoenix Security Products comes full circle

Phoenix Security Products has rolled into Spring with the new **Round Shackleless Padlock and Heavy Duty Hasp & Staple**. Built to be practical and hardwearing, this new lock and hasp is a classic addition to the Sterling range.

The new Round Shackleless Padlock is designed for tough security situations, but is particularly popular as a way of securing the doors on vans and trucks. This Sterling lock comes with a hardened steel chrome plated body for added durability and corrosion resistance. For convenient customer security, the Round Shackleless Padlock also comes with 3 keys. This is ideal for situations when more than one person needs access to the lock.

For a high security partnership, this padlock is perfectly teamed up with the Sterling Heavy Duty Hasp & Staple. The Sterling Heavy Duty Hasp & Staple is made from tough, chrome plated, hardened steel. This hasp & staple has been designed to protect the padlock for increased security. This allows for a secure solution on hinged or sliding doors.

As with all of Sterling's great value products, the Round Shackleless Padlock and Heavy Duty Hasp & Staple come with Phoenix's 10-year guarantee. For POS purposes, it is available in clam packs for maximum display impact.

For more information on the Sterling range visit the website @ www.sterlinglocks.com or call Phoenix Security Products Ltd on 0113 250 3603.
