

Protect the Patio this Summer with Sterling

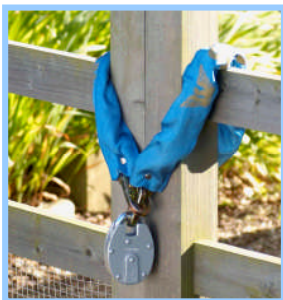

Release
Press

Making the most of summer weather means plenty of alfresco dining, whether it's breakfast with the birds, lunch on the lawn or dining in the dusk. But garden furniture and BBQs are also tempting for thieves looking for an easy steal! Garden equipment is often both expensive and portable; the best way to make sure that you don't lose out to light fingers is to lock it up securely. Trust Sterling to make it **simple**, **swift** and **safe**.

Patio Protection

Patio furniture can be linked together and locked up with one easy click thanks to Sterling's **Link&Lock**. Tough security cables with protective sleeves to safeguard paintwork or finishes, the Link&Lock system is the perfect way to make sure your stuff stays put.

Look Locked Up

Sometimes a look is all it takes! Burglars are looking for an easy ride. They don't want to spend too long, and they don't want to make much noise. A large padlock and chain on the gate tells the world you're not an easy target, and can be enough to send thieves packing. For more information call 0113 250 3603 or visit www.sterlinglocks.com **Ends**

Top Tip

Don't hide a spare key under that mat. It's the first place a burglar will look! If you need to have a spare key available then use the combination-locked Sterling KeyMinder and make sure that only the right people get hold of it!
