

Don't let thieves cash in on your barbecue season

With long hot summer nights on the way gardens become full of the paraphernalia of summer fun. Barbecue's, trampolines, outdoor dining sets and gardening gear adorn lawns countrywide. All of this equipment makes a tempting proposition for thieves. But how do you make sure your summer isn't spoilt by a sticky fingered scallywag? The Sterling range has the answer with a range of security solutions for the home and garden.

A barbecue and dining set are essential for garden entertaining, but are also an easy target for thieves. Securing them is simple. Linking a Sterling double loop cable (ssp from £4.99) through the barbecue or the garden furniture and securing with a Sterling weatherproof padlock (ssp from £6.99) or long shackle padlock (ssp from £4.99), provides a secure solution to keep them put all summer long.

For added security, utilise one of the Sterling security anchors (ssp from £13.99) to provide a permanent security fixing for the cable or chain.

Sterling's selection of security products has a wide range of uses. Ladders, lawnmowers and other garden tools can be linked together with Sterling chains or cables and secured with a padlock. Sterling brass padlocks and stainless steel disc padlocks are ideal for use on a shed or garage and bikes can be locked away using a Sterling D-lock (ssp from £8.99). All of the Sterling cable & chain range comes with protective sleeving to avoid scratching expensive paintwork on cycles or damaging wooden garden furniture. Sterling also offers the option of keyed-alike multi-pack padlocks, which means you can secure many items in the garden with the same key.

No matter what the security dilemma this summer, Sterling has a sensible solution. With a proven track record for safety, security and durability, Sterling products give security peace of mind.
