

# Clocks Back - Locks On!

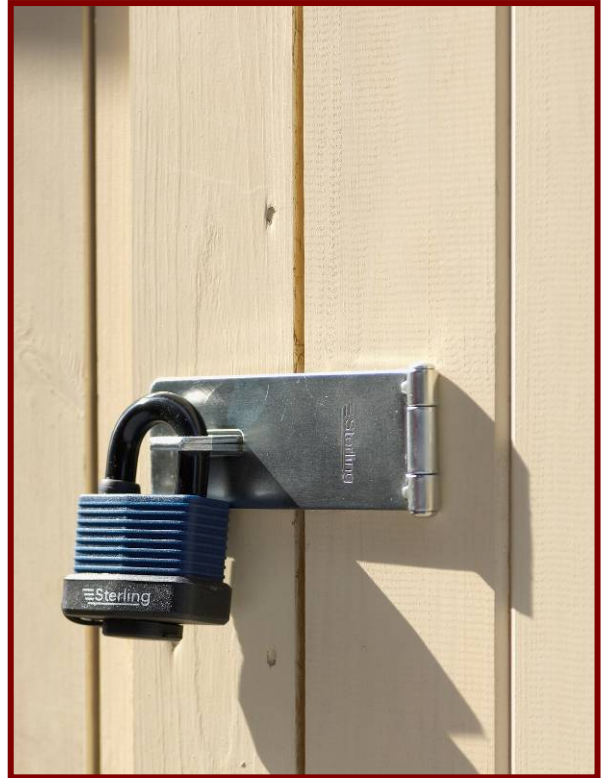

Press Release

Press Release

With the clocks going back, it's time to lock up for the long dark nights ahead. One of the best things about autumn is being able to batten down the hatches and settle into the warmth. But the cover of darkness can be a real boon for burglars! Fortunately it's easy to lock up safe and sound this autumn with a little help from Sterling.

The best way to keep thieves off your property is to make sure all perimeter doors and gates are securely locked. Most burglars are opportunists, so a simple, strong **padlock** can be all it takes to send them off looking for easier prey. A tough **weatherproof** padlock will make sure that it is protected from all the elements – not just criminal ones!

Protecting sheds and outbuildings is always important, but in the darker months it becomes harder as the long nights offer great concealment. A Sterling **Hasp & Staple** combined with a good padlock will safeguard your garden shed. But for other outbuildings such as workshops or tack rooms, it can be worth investing in something stronger. Sterling offers a range of stylish **digital door locks** that will ensure that only code holders get access. As tough as they are stylish, Sterling's digital door locks present a serious line of defence. Inside, remember that portable items can be joined together with **Link & Lock security cables**, making them difficult to carry off, or even to get through the doorway!

All Sterling products are made to deliver high quality at great value, meaning strong security needn't come at a prohibitive price. For more information or to find your nearest stockist, contact 0113 250 3603 or visit [www.sterlinglocks.com](http://www.sterlinglocks.com) **ENDS**
