

# A Successful Combination - New Bolt from Sterling Locks

Sterling Locks is following up on the launch of its award winning Stainless Steel Disc Combination Padlock (CPL170) with the launch of a **NEW Sterling Combination Locking Bolt** (CLB110BK). This has a strong, corrosion resistant zinc diecast body with chrome plated steel bolt. The bolt can be locked in both the open and closed position with the resettable combination.

Supplied with anti-tamper security screws, the combination bolt can easily be fixed either vertically or horizontally making it suitable for all applications. Because it is so simple, it is brilliantly effective and is sure to bring in great sales for retailers. Effortless to fit, easy to use, efficient and secure, it's typical of the latest generation of products from Sterling Locks providing a clever solution that still holds true to the brand's traditional strengths of value and quality.

This product is perfect for summer sales as it is ideal for gardens and outside areas. It provides the simplicity of a bolt with the extra benefit of a combination access so that any number of approved people can open it without the need for duplicate keys. It can be used as a safety precaution to stop children entering gated areas such as a pond or swimming pool.

It can also be used for sheds or outbuildings that have dangerous garden chemicals or valuable equipment in. For interior use, it could be used on under stairs storage areas or attic access points as well as cupboards. Anywhere where entry is better restricted, due to storing valuables or to protect children.

For more commercial applications, the Sterling Combination Locking Bolt can be used to provide convenient access to lock ups, storage areas or sheds. It can also be fitted to gates giving multiple access to parking areas, or on doors to restrict entry to approved individuals.

Retailers will appreciate having a new and clever product to encourage extra sales and with this new product, they know they will get Sterling's usual good margins and good service.
