

# Spring into Action! Garden Security with Sterling

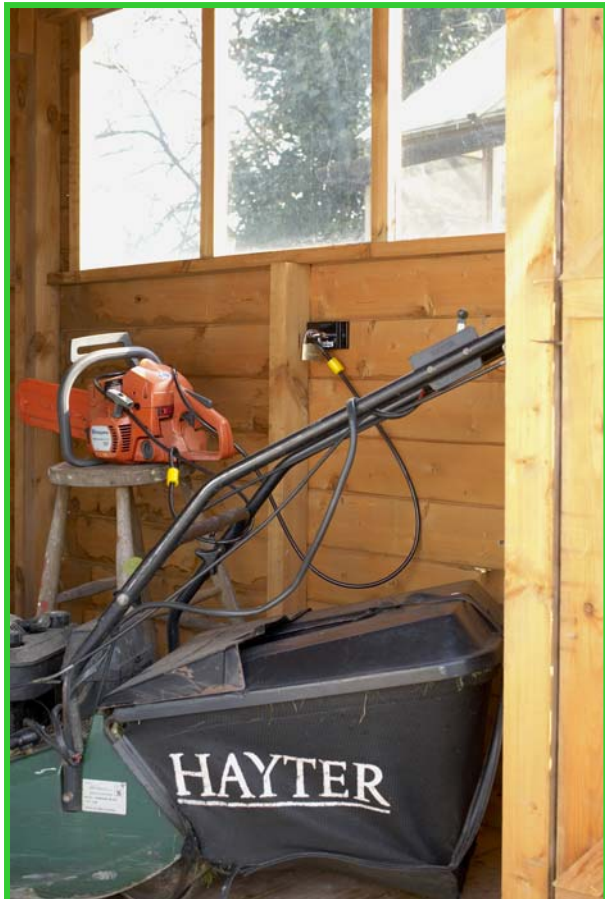

With the first buds of spring come the urge to throw open the doors and windows, let fresh air into houses stuffy over winter, and get the garden into shape. Spring is the busiest time of year for gardeners, so it can be difficult to remember to lock up safely when you break for a cuppa or at the end of the day when you're tired. But did you know that the value of the contents of your garden shed can be as much as £2000, Thieves do! This is one of the reasons that garden crime is on the rise. Fortunately help is at hand with security specialists Sterling.

### Secure That Shed!

Most sheds can be safely secured with a tough **padlock** and a **hasp & staple**, which is enough to keep out opportunist thieves. Choose a solid brass double locking padlock from Sterling – together with a one of Sterling's hasp options – to make sure that the door stays locked in your absence.

Press Release

For added security, consider fitting a **rim sashlock** to the door. With a reversible latch and a key operated deadbolt, this sort of security is way to show burglars you mean business. Don't forget to make sure that shed windows are shut as well!

*Sterling's rim sashlock*

Inside the shed, you can lock expensive tools and equipment together with Link & Lock security cables. Tough braided steel cables with a protective vinyl sleeve, security cables can be used to join items together. This makes trying to cart them off more trouble than it's worth. For the ultimate security, they can even be locked to a Ground / Wall Anchor.

Fixed securely to a flat surface, anchors make sure that no-one will be taking anything unless they came prepared to bring the shed too! Link & Lock cables are also ideal for garden furniture or anything else that needs to be protected, like bicycles or gas barbecues. The vinyl sleeve protects paintwork and finishes, whilst the steel core does the guarding.

**Guard That Garden!**

If you are out in the garden or away from the house, make sure that the gate has a secure padlock on it. A closed shackle disc padlock is one of the most secure options you can buy. The laser-welded stainless steel body is corrosion-resistant so it will keep out the weather as well as intruders. The hardened steel shackle and closed-shackle design make this one of the hardest padlocks to get past, whilst the mushroom-headed anti-pick pins are guaranteed to frustrate 'amateur locksmiths'. Trust Sterling for security that doesn't compromise at a price that's right.

Finally, don't forget to lock up the house! It's the time of year for spring cleaning, and that usually means giving the house an airing and blowing away the cobwebs of winter. But don't let that mean that there are entrances and exits unguarded.

It only takes a moment for an opportunist thief to reach in and swipe something. **Patio Door Locks** are simple to fit, and will make sure your windows don't act as access points.

**Top Tip:**  
*Don't forget to lock up tools like spades, ladders, or crowbars. They are all things that a burglar could use to break into your house!*
