

Holiday Homes: Safe as Houses!

The one thing guaranteed to ruin your holiday is a burglary. Holidays are one of the times of year when you are likely to be carrying more cash than usual, as well as valuable documents like passports. Not only are you more relaxed on holiday, but if you're far from home you become an easier target; you won't be around for long, and may not even speak the language! Thankfully, help is at hand with safety solutions from Sterling.

The Sterling **SafeCan** is the ultimate in great value security. Designed to imitate every day items, right down to the brand details, the SafeCan actually provides storage space to hide an emergency set of keys, cards, cash, personal papers or passport. The idea is to hide things in plain sight inside common items like books, food tins, aerosols and candles. There is a Safecan design for every situation, from a hotel room to a boat to a self-catering cottage. Supremely portable, the SafeCan also has the added benefit of not looking like a safe or a lockbox, meaning that it doesn't announce to the world that it's worth breaking into! Starting at £3.99, SafeCan isn't going to break the bank either.

Don't forget to safeguard luggage as well. Most thefts from bags are split-second and opportunist. No-one wants to be seen fiddling with a bag which isn't theirs, so a simple padlock can be all it takes to ensure that no light fingers make it into yours! Brightly coloured to make it easy to identify your luggage, **Sterling Travel Padlocks** come with a three dial combination, meaning that there are no keys to lose, as well as making it easy for multiple family members to have access to the same bags if necessary.

Sterling is known for offering high quality products at great value prices, with an emphasis on intelligent security solutions. To find out more about SafeCan or any of the Sterling ranges, or for stockist information, call 0113 250 3603 or visit www.sterlinglocks.com **ENDS**

Top Tip: These days, many bags and cases look the same. Using coloured locks, ribbons or bright labels will all make it less likely that someone will walk off with yours by mistake!
