

# Safer Sheds and Guarded Gardens Summer Sales from Sterling

Summer's almost here and that means more people in the garden, whether soaking up the sun, mowing the lawn, or making a meal al fresco. Most people forget how much the equipment in the garden is worth though, so it falls to retailers to remind them to sort out their security! With the value of the average garden shed at more than £2,000, there is money to be made in good advice and security sales, which is why its time to get on board with Sterling.

Garden gates are the first point of entry so remind customers to beef up their perimeter security with a tough **Padlock**. For maximum security – and an extra sale! – the best partner for that padlock is a strong Sterling **Hasp**. Whether it's on a gate of a shed door, this pairing is enough to tell a thief to look for easier pickings.

Inside most sheds is an array of tempting tools. But if they can't be taken away, they're no good to a thief. This is why it's worth telling customers about Sterling's **Link & Lock**. Tough steel cables with a protective sleeve, Link & Lock makes it simple to secure items together, making them almost impossible to remove. And in order to make sure they stay put, the cables can be firmly locked to a **Ground / Wall Anchor**.

Finally, for outbuildings and sheds that really need that little extra, remember that Sterling now offers a range of **Stand Alone Alarms**. With a choice of **PIR Motion Detectors** and **Door / Window Alarms**, installation is as simple as mounting on a wall, or even placing on a flat surface. The alarms are a Very Loud 130dB, making them a noise to be reckoned with.

Sterling is committed to helping retailers maximise on sales, which is why all Sterling products offer very high quality at bank-beating value. For more information on how Sterling can help you this summer, call 0113 250 3603 or visit [www.sterlinglocks.com](http://www.sterlinglocks.com) **ENDS**
