

Worry-Free Winters with Security from Sterling

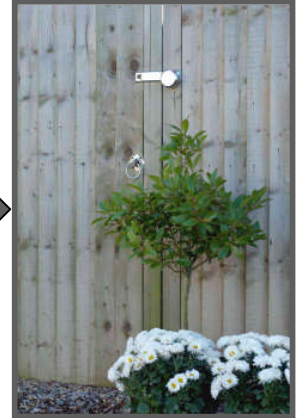

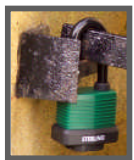

Press Release

Whether it's the garden gate or the back gate – it's important to have the type of security that will back off burglars from the start. A high-quality, heavy-duty set of locking products are the answer.

Burglars and light-fingered opportunists are looking for an easy life. They want to get in and out as quickly as possible. So it's not just the problem of getting around a lock, it's the amount of time it might take. Highly visible locks and chains not only do a great job – they also make a thief take a second thought and perhaps move on to a less challenging property.

For more information about the Sterling range of security products call 0113 250 3603.

Top Tip: Lock Up Ladders!

The garden shed's often the first place a thief will look. Not only can it be a source of valuable items that are easy to take, sometimes there will also be a ladder left around. A little opportunistic luck and there'll also be a window that can be forced as well.

Back off the burglars by linking ladders together with other items which are all secured to a good floor or wall anchor.
